

IMPORTANT: TECHNICAL NOTE

PLEASE READ THOROUGHLY

TH-100 TANK HEATER

PLEASE READ THE FOLLOWING REQUIREMENTS BEFORE USING THE TH-100.

- Unit must be in water no less than 12” to 16” deep at all times and plugged into a 15 amp/gfi circuit.
- Unit needs to be properly cleaned. Build-up from tank water greatly affects efficiency of unit. Clean build-up with “CLR” or other lime/calcium cleaner. This must be done with unit off, unplugged and removed from tank.
- If unit fails, remove unit from tank, unplug and check fuse.
- Again, unit may need to be cleaned and maintained.
- This unit carries a 90 day warranty from date of purchase; proof of purchase date is required for warranty to be in effect.
- Any misuse or negligence voids warranty.

**Before returning unit to distributor, a return goods authorization must be issued

**Proper packaging is also required.

**Manufacturer has the right to void warranty if above requirements are not met.
